

Daniela Mercury Home Studio, S.Paulo, BR

CDM-FLOAT

Owner	DANIELA MERCURY
General Contractor	GINER AUDIO SOLUTIONS
Acoustic Consultant	GINER AUDIO SOLUTIONS
Architect	Thaísa Camargo
Total Area	21 m ²
Installation	2010

Daniela Mercury is a Latin Grammy Award-winning Brazilian axé, samba-reggae and MPB singer, songwriter and record producer. Since her breakthrough, Mercury has become one of the best known Brazilian female singers, selling over 20 million albums worldwide.

Daniela Mercury wanted a space in her new apartment so she could write and rehearse new songs at home.

Living in a high-end condo, concern about the noise and vibrations generated by the sound was high. Thanks to a box-in-box system with CDM-FLOAT based on CDM-79 pads, 50x50x50 mm³ solution (having a natural frequency of 7 Hz) a high level of vibration and airborne noise isolation is achieved.
