CDM-POOL

Client Azinor Group
Architect Nuno Leónidas Arq.
Acoustic Consultant Engenharia de Acústica e Ambiente
Main Contractor HCI

• Azinor Group is a multinational hospitality company, established in Lisbon, with brand hotels and restaurants worldwide.

• As result of the long term partnership existing between CDM and the Azinor Group, a special CDM-POOL systems was developed for Sud Lisboa Restaurant. Sud Lisboa Restaurant is the new exclusive restaurant and event space, from Azinor Group, situated in the Tagus river side walk in Lisbon, next to the MAAT museum.

• A rooftop swimming pool was built over a CDM-POOL system specially designed for low frequency noise isolation, generated by pool activities.

• This design makes possible the pool activities in the rooftop level, with its splendorous view over the river side, as it permits high quality sound isolation to the lower indoor floors.
