

Stravilink QRW^{*}

Datasheet

Stravilink QRW is a [isolated wall system](#) designed to isolate a standard wall channel therefore optimising sound insulation between horizontally arranged rooms.

BENEFITS

- Cost effective
- Quick and easy to install
- Profiles are mechanically fixed to wall to ensure that wall profile cannot escape
- Steel elements are Zinc plated
- System comes optionally with perimeter isolation strip to isolate the perimeter of the ceiling from the surrounding structures
- To assess if the Stravilink QRW system is appropriate CDM Stravitec's engineers will need the following information:
 - The weight and construction of the supported wall - this will determine the type of hanger
 - The weights and support locations of any items hung from the wall

*Previously known as CDM-QRW

TYPICAL ASSEMBLIES

1. Stravilink QRW
2. Plasterboards, gypsum board or dry lining
3. Wall
